
LIMITATION OF USE (CYPRES components)

As we recently experienced an increased unintended utilization of our CYPRES cutters and other CYPRES components and spare parts (for example but not limited to: cutter, cutter extension, control unit connector, water filter), we decided to limit the use of any CYPRES components and spare parts to the purpose described in our user guide with a CYPRES device to protect our liability and our reputation.

Any use of our spare parts without written and signed permission from our side is a violation of our terms and conditions and will result in legal consequences ranging from injunctions to compensation claims, by a minimum of 50.000,00 Euro for each violation.

By filling out this application, you're applying for an exception of this limitation of use.

Completion of this application does not grant any right to the use or utilization of the Components or spare parts in the described project. Only a written and signed confirmation grants this.

We do not accept any liability for any use of CYPRES components and spare parts outside the purposes described in the user guide. Even a written and signed exception does not represent any liability for any other utilization beyond the one described in the user guide.

The liability and the possible consequences, such as, but not limited to; personal injury up to and including death, property damage of third parties and damage of governmental property are explicitly the responsibility of the appointing party.

The customer acknowledges and agrees that the CYPRES components (cutter, cutter extension, water filter, control unit and connector) will be exclusively used with CYPRES AAD devices built from Airtec GmbH & Co. KG Safety Systems in accordance to the CYPRES user guide. Additionally, the Customer shall not reverse engineer, decompile, or disassemble the CYPRES components. Any infringement will be punished with a fine of 50.000,00 Euro for each violation.
